

Membership is the key for success in any group, because there *is* strength in numbers. Creating a voice for our industry both locally and on the state level is vital. Our membership drive is about to launch for this year and we are excited as we are starting to see a slight pick-up in construction.

The drive to acquire new partners for the Builders' Exchange will run from September 2011 to February 2012 and we would like to encourage everyone to participate. Our goal is [50] new business partners and yes, there are incentives! Please check out the website for details on the prize levels. We need everyone to help build up our organization and to make it work – participation is a necessary ingredient to getting the most value from your membership.

Our membership consists of key players and connected businesses within the construction industry which are committed to members doing business with members. Currently we have 384 active members and need to increase our membership base. This is our goal, to build and strengthen one another in order to grow and maintain a solid business base in our community. We are committed to keep working and be productive. In our current economic times it is important for each and every company to become a member to be visible, because invisible is out of business.
