

CYBERSECURITY PLAYBOOK

FOR CONTRACTORS

Wednesday, January 22
11:30am to 1:15pm
GROVE Restaurant
Fever Tree Hall

Your data is a financial gold mine and there are professional thieves focused on getting it. There is no more “if” you have a breach, it is now “when” you have a breach and how you react. Top organizations and government entities with teams of security experts have been compromised. Everyone must make this a priority, be on high alert and have a response plan.

A graphic featuring a blue shield with a white padlock in the center. The background is dark blue with a pattern of binary code (0s and 1s).

Attendees will learn about the National Institute of Standards and Technology (NIST) Framework, a comprehensive five-step process that helps businesses prepare for the cyber-attacks threatening your data.

Presented by Nathan Bailey, Chief Operating Officer for SouthTech, in a fireside-chat-format with David Karins from Karins Engineering Group and Jared Hawkins from Atlas Insurance Agency, you'll hear real-world stories about how contractors are protecting their assets. All attendees will receive a Cybersecurity Playbook to guide them through the step-by-step process.
